

Maximizing your R&D Tax Credits

ayming

FURTHER **TOGETHER**

You may not be benefiting

The US R&D Tax Credit Incentive Program provides over \$8 billion in funding annually to only 2% of eligible companies. Despite recent changes that have broadened the eligibility of what is categorized as qualified research activities, companies continue to underutilize this opportunity.

With no limit on the R&D Tax Credit funding, U.S. businesses can stand to receive many potential benefits, which might include:

- A reduction in your company's federal and state tax liabilities
- Carrying forward money saved to reinvest in further research and development
- An increase in your cash flow
- Generating higher profits & solidifying your market presence

Why Ayming?

We deploy our team of expert scientists, engineers and lawyers to understand your business, investigate your activities and determine your qualified research activities. Ayming maximizes your returns while effectively and efficiently minimizing any time burden on your business operations.

Our 30-year track record of helping businesses of all shapes and sizes has given us a wealth of experience in managing R&D tax credit claims. We take the time to truly understand your business goals and objectives, focussing on how your business innovates in order to identify qualifying expenditures.

How we work with you

Our process is designed to minimize interruptions to your time and resources. We will work closely with your internal R&D management team to accurately apply the appropriate tax code to provide the maximum benefit to your business.

1. Pre-Assessment

- Establish client's needs and agree on scope of work and objective
- Meet with your technical and financial points of contact

2. Approach

- Analysis of relevant client data
- Face to face interviews and site visits
- Analysis of past assessments and credits

3. Delivery

- Completion of all pro-forma tax forms
- Ongoing support for any post-claim requirements
